

*We Keep
Things Moving*

*For
Philadelphia
and US Airways*

We are pleased to have played a part in the growth of the Philadelphia International Airport through our nearly 20-year relationship with US Airways, the airport's busiest carrier.

As the premier automated baggage handling system designer, manufacturer, and installer in North America, BAE Automated Systems plans to continue this longstanding commitment to Philadelphia into the next millennium.

Our primary goal is to satisfy the number one concern of air travelers - to keep things moving and have their baggage arrive when they do.
